Career Objective

Computer Science undergraduate seeking software development opportunities to apply problem-solving and programming skills in backend and full-stack engineering. Interested in building scalable APIs, database-driven applications, and AI-powered solutions while strengthening expertise in DSA, Generative AI, and modern software development.

Education

Pranveer Singh Institute of Technology (PSIT) 2024 – 2028
Bachelor of Technology in Computer Science and Engineering CGPA: 7.54/10

Rani Laxmi Bai Memorial School 2024
Class XII (CBSE) 70.6%

Rani Laxmi Bai Memorial School 2022
Class X (CBSE) 74.6%

Certifications

- **AWS Planning a Generative AI Project** – Amazon Web Services (AWS)
- **AWS Introduction to Generative AI – Art of the Possible** – Amazon Web Services (AWS)

Projects

SolisIQ – Smart Solar Usage & Savings Monitoring System Source Code

Tech Stack: React.js, Python (FastAPI), MongoDB, JavaScript, Chart.js, REST APIs

- Developed an AI-powered application that recommends optimal solar panel capacity based on electricity consumption.
- Built a responsive React.js and Chart.js dashboard to visualize energy generation, usage, savings, and environmental impact.
- Developed FastAPI REST APIs for authentication, solar sizing calculations, and data management.
- Implemented electricity bill reduction, ROI, and solar payback period calculations.

ZeroHour – Interactive Web Application

Tech Stack: HTML, CSS, JavaScript

- Developed a real-time countdown timer displaying remaining days, hours, minutes, and seconds for a selected date and time.
- Implemented JavaScript date calculations, dynamic DOM updates, automatic completion handling, and responsive UI design.

Technical Skills

Languages	C++, Python, C, SQL
Frontend	React.js, HTML, CSS, Tailwind CSS, JavaScript (ES6+)
Backend	FastAPI, REST APIs, Firebase Cloud Messaging (Learning)
Databases	MongoDB, MySQL
Tools	Git, GitHub, VS Code

Achievements & Profiles

- Solved **250+ Data Structures and Algorithms problems** on LeetCode, covering arrays, strings, linked lists, stacks, queues, trees, and recursion.
- Maintained consistent daily coding practice focused on improving algorithmic problem-solving and data structure fundamentals.
- Earned **2 AWS certifications** focused on Generative AI and planning Generative AI projects.
- Developed projects involving frontend development, REST APIs, database management, and AI-powered application concepts.
