Career Objective

Computer Science undergraduate with hands-on experience in full-stack development, backend engineering, machine learning, and AI-powered applications. Skilled in developing REST APIs, database-driven systems, interactive web applications, and ML-based solutions through academic and personal projects. Seeking software development opportunities where I can apply strong problem-solving and programming skills, contribute to scalable and reliable software solutions, and continue developing expertise in Data Structures and Algorithms, backend systems, AI/ML, and Generative AI.

Education

Pranveer Singh Institute of Technology (PSIT) 2024 – 2028
Bachelor of Technology in Computer Science and Engineering CGPA: 7.54/10

Rani Laxmi Bai Memorial School 2024
Class XII (CBSE) 70.6%

Rani Laxmi Bai Memorial School 2022
Class X (CBSE) 74.6%

Certifications

- **AWS Academy Graduate – Machine Learning Foundations Training Badge** – AWS
- **AWS Planning a Generative AI Project** – AWS

Projects

SolisIQ – Smart Solar Usage & Savings Monitoring System Source Code

Tech Stack: Python, Flask, MySQL, JavaScript, HTML, CSS, Scikit-learn, Pandas, NumPy, Joblib, REST APIs, Render

- Developed an AI-powered solar advisory platform recommending solar panel capacity based on electricity consumption.
- Built Flask REST APIs with MySQL for authentication, solar calculations, and data management.
- Implemented electricity savings, ROI, and solar payback calculations with a responsive dashboard.

AI-Powered Incident Intelligence & Root Cause Analysis Platform (Ongoing) Source Code

Tech Stack: Python, FastAPI, Scikit-learn, Pandas, NumPy, Joblib, REST APIs

- Developing an AI-powered platform for anomaly detection and incident root-cause analysis.
- Trained and evaluated a machine learning anomaly-detection model using feature engineering, validation, and serialized model artifacts.
- Built FastAPI services for incident ingestion, anomaly detection, analysis, and evidence retrieval.

SETU – Smart Emergency Response System Source Code

Tech Stack: React.js, FastAPI, PostgreSQL, Python, Leaflet, OpenStreetMap, REST APIs

- Developed an emergency response platform for distress-report processing, automated triage, and volunteer coordination.
- Developed an interactive emergency map using React.js, Leaflet, and OpenStreetMap for incident visualization.
- Implemented location-based volunteer matching and map-based emergency response coordination.

Technical Skills

Languages	C++, Python, C, SQL
Frontend	React.js, HTML, CSS, Tailwind CSS, JavaScript (ES6+)
Backend	FastAPI, Flask, REST APIs, Firebase Cloud Messaging (Learning)
Databases	MongoDB, MySQL, PostgreSQL
ML/Data	Scikit-learn, Pandas, NumPy, Joblib
Tools	Git, GitHub, VS Code

Achievements & Profiles

- Solved **250+ DSA problems** on LeetCode, covering arrays, strings, linked lists, stacks, queues, trees, and recursion.
- Earned **2 AWS credentials** focused on Machine Learning and Generative AI project planning.
- Built projects involving frontend development, REST APIs, databases, machine learning, and AI-powered applications.
